DETAILED ACTION

Current Status

1. Claims 1-16 are pending in the application.

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-16 provide for the use of compounds, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 12-16 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1621

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al., {US 7,294,600 same as WO 2004087770}.

Lee et al. disclose applicants claimed compounds. See compound in the abstract.

Claims 7 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kinashi et al., {JP 62149721}.

Kinashi et al. disclose applicants claimed compounds. See pages 3 and 4.

Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Gusev et al., {Synthesis, Structural Diversity, Dynamics, and Acidity of the M(II) and M(IV) Complexes [MH₃(PR₃)₄]⁺ (M = Fe, Ru, Os; R = Me, Et, Journal of the American Chemical Society (1997), 119(16), 3716-3731}.

Gusev et al. disclose applicants claimed compounds. See compounds in the abstract.

Allowable Subject Matter

Claims 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Allowed Claims

Claims 1-6 are allowable over the prior art of record.

The following is an examiner's statement of reasons for indicating allowable subject matter: A search of the prior art failed to uncover any reference that anticipates or renders obvious a process of making a phosphonium borate compound, as claimed by applicant.
